# Brush Up

Baby hairbrush? Designer toothbrush? M.A.C.'s new Masterclass makeup brushes look entirely unfamiliar. And the angle is that you don't have to angle them. "Traditional makeup brushes are better suited to use on someone else's face," says Nick Gavrelis, vice president of global product development at M.A.C. With bristles that are perpendicular to the handle, this new design gets fingers, hands, and handles out of the way, allowing for freer movement and greater precision when applying your own makeup. The dense, synthetic bristles are exceptionally soft, which lets you apply creams and powders with zero streaks and almost zero effort. —SOPHIA PANYCH

Makeup artists tested the brushes backstage during fall 2013 Fashion Week.

## Smell This Fendi L'Acquarossa

**THE NOTES:**

*Bergamot, rose, red cedarwood, and patchouli.*

**THIS MONTH'S EXPERTS:**

*A New York City chef, fragrance consultant, and sommelier.*

—ALEXANDRA OWENS

*"It reminds me of green coriander. I wouldn't call it spicy because it's so well balanced, but it's very aromatic."*

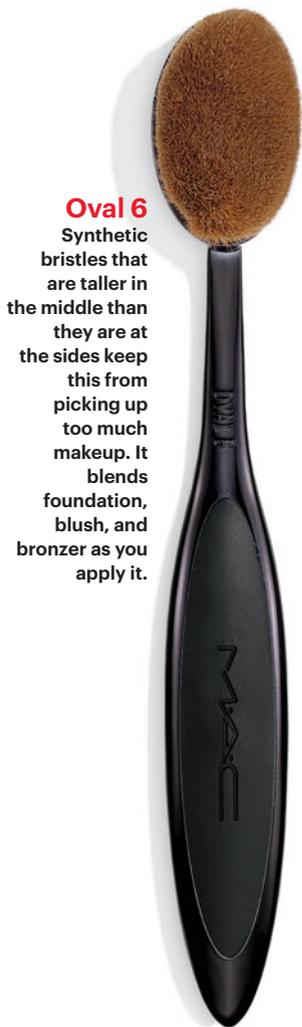

—Andrew Carmellini, co-owner of Locanda Verde, Lafayette, and The Dutch

*"It's warm and woody with a hint of spice."*

—Ann Gottlieb, fragrance consultant, Ann Gottlieb Associates

*"I like it because it's not too much. The spices and florals have a strong, elegant presence without seeming invasive."*

—Roberto Paris, wine director of Il Buco Alimentari & Vineria

**Oval 6**

Synthetic bristles that are taller in the middle than they are at the sides keep this from picking up too much makeup. It blends foundation, blush, and bronzer as you apply it.

**Oval 3**

Forget flat, domed, and tapered eye-shadow brushes—this does the job of all three. Place it on your lid, sweep it along your crease, or point it right at the inner corner. It's also great at applying concealer in hard-to-reach places (like the sides of your nose).

**Linear 1**

The solution to shaky hands, this brush practically draws straight lines along the lid for you. Just position it at the inner corner of one eye and pull the brush sideways. The bristles cover twice the area of a traditional eyeliner brush—and it works on brows and lips.

**Tip**  
*They may look like toothbrushes, but don't use them that way. Light, gliding motions (rather than stiff scrubbing ones) get the job done gently.*
